

Transgrid Group's subsidiary, Lumea, is poised to facilitate the connection of a monumental Battery Energy Storage System (BESS) to Australia's grid. This initiative forms a crucial part of ACEN Australia's \$768 ...

New England Solar is a 720MW solar and battery project currently being built in stages near Uralla in the NSW New England region. The project sits across a 2,000-hectare site of mostly cleared grazing land, traversed by an existing 330kV ...

The New England BESS with its innovative inverter system is being built with the support of the NSW Government's Emerging Energy Program. The AU\$75 million (US\$49.8 million) programme provides grant funding to assist with the development of innovative, large-scale electricity and storage projects in NSW.

Under the agreement, Energy Vault will deploy a 50 MW / 100 MWh battery energy storage system (BESS) and a separate 150 MW / 300 MWh battery at the site of ACEN's multi-stage 720 MW New England solar project ...

EVLO's deployments to date, as listed on the company's website, have been within its home country of Canada, with the exception of one 9MW/9MWh BESS in France inaugurated in 2022 for fellow Quebec-headquartered company Innergex marking its first international project. The firm's first BESS project commissioned in the US. Image: EVLO Energy.

In 2022, the company was selected to provide the BESS at Victoria's 330MW Meadow Creek solar PV plant. Renewable energy developer Acen Australia appointed Energy Vault earlier this year to provide a ...

Construction of New England Solar's utility Battery Energy Storage System (BESS) has reached a major milestone, with works set to start next week expanding the Uralla site's Transgrid switchyard. The switchyard bay will connect the New England Solar BESS to the transmission network.

Switzerland-based Energy Vault has secured contracts from ACEN Australia to deploy two large-scale BESS. The systems total 200MW/400 megawatt-hours (MWh) and will support the 720MW New England solar project near Uralla in New South Wales (NSW), one of the largest in Australia's national electricity market.

The vertically integrated manufacturer's new battery energy storage system (BESS) includes the company's own 306Ah high energy density lithium iron phosphate (LFP) cell, enabling 4,073kWh nominal capacity in a standard 20-foot container. ... Having announced the first commissioned project for Elementa in East England at the Energy Storage ...

NextEnergy Solar Fund's (NESF) maiden standalone 50MW battery energy storage system (BESS) has gone

live, bringing the developer's total net installed capacity to 1,014MW. The 50MW BESS, dubbed "Camilla", is a 1-hour lithium-ion ...

Along with advancements in safety, BESS will also see innovative developments in technology this year. The BESS industry has been dominated by lithium-ion batteries, but the need for more long-duration storage, which cannot currently be done economically and safely with lithium, will open the door for promising non-lithium technologies.

Updating the New York Fire Code will increase the safety and standardisation of installations in the state, Energy-Storage.news has heard. ... every BESS installation should have an Emergency Safety Response Plan in place, and a Fire Code exemption for electric utility-owned or operated projects should be removed, the Working Group said ...

DK BESS 2 joins the original 34.7MW project feeding into the Darwin-Katherine Interconnected System, which services around 150,000 people in the Northern Territory. Image: Territory Generation. Two new BESS projects have been announced in Australia, with the DK BESS 2 in the Northern Territory and a 200MW BESS project in New South Wales.

SSE Renewables has launched its first operative battery energy storage system (BESS) with a capacity of 50MW/100MWh. The final energisation tests for the 2-hour duration BESS, located at Salisbury, Wiltshire in South West England, were completed last week, and the asset is now trading in Great Britain's wholesale energy market.

The Australian arm of Philippines-based energy company ACEN Corp and the subsidiary of Japanese investment giant Marubeni have signed a cooperation agreement for the joint development of the two-hour New England ...

ACEN Australia has signed an agreement with Transgrid Group's contestable business, Lumea, to connect a new Battery Energy Storage System (BESS) as part of its New England Solar Farm project. Stage one of ACEN ...
