

Nomad solar panel Bouvet Island

Can I use the Nomad solar panels with the Yeti 200?

You must use the Nomad solar panels with the Yeti 200 and not directly to charge devices. These panels are designed to work with the Goal Zero battery and that is the product you need to charge your devices off of while traveling.

Can I use the Nomad solar panels to charge a cell phone?

The Nomad solar panels cannot be used to charge a cell phone directly. Although there is a USB output, it is strongly discouraged as the panels do not contain a charge controller. An intermediary battery like the Yeti 200 is required.

What's the difference between a nomad 7 and a solar panel?

The actual solar panel is different to my older nomad 7, it's a very dull but durable material over the shiny material used on the nomad 7. Packs down nicely got a nice fairly light weight to it, would definitely recommend it!

Can I charge my Yeti with the Nomad?

The Nomad solar panel is designed to charge the Yeti battery and should not be used to charge devices directly, as it does not contain a charge controller. Charging a phone directly with the Nomad will ruin the battery.

Can the Nomad 50 charge a Goal Zero Sherpa 100AC?

Yes, the Nomad 50 can charge a Goal Zero Sherpa 100AC in 3-6 hours.

Battery storage capacity is measured in Wh, and power output is in W (Watts) **ARGE TIME WITH SOLAR-**
Calc: Hours to charge battery = Battery capacity (Wh) / (Panel Wattage x [0.5 or 0.75])-- In a perfect lab environment, ...
