

What is Oman's power system?

power system comprises of two major publicly-owned electricity networks: the Main Interconnected System (MIS) and the Dhofar Power System (DPS). The MIS covers most parts of the Sultanate's North region¹, serving around one million electricity customers, and comprising of some 90% of Oman's total electricity peak demand.

How can a competitive electricity market be built in Oman?

A fair and transparent regulatory regime has helped to encourage greater private sector participation and build a competitive electricity market in Oman. A competitive wholesale electricity market with a larger presence of IPPs is likely to enable future cross-border electricity trading.

Does Oman need a transmission expansion plan?

Further, as southern parts of Oman have significant renewable energy potential (wind and solar), this transmission expansion plan can also enable the effective realization of the country's renewable energy potential, including potential electricity export opportunities in the region.

Are Oman's electricity tariffs still subsidized?

Source: Bulk Supply Tariff (Jan. 1, 2017-Dec. 31, 2017), Authority for Electricity Regulation. Despite making progress on reforming the electricity sector since 2004, retail tariffs in Oman are still subsidized by the state.

Will regulating the gas network be included in Oman's future mandates?

To further streamline the energy market, regulating the gas network may be included in the Authority for Electricity Regulation's future mandates. Nearly one quarter of Oman's domestic natural gas production (32.3 billion standard cubic meters) is used to power electricity generation and water desalination plants.

What are the challenges to price control in Oman?

Challenges to price controls have been addressed through innovations in the regulatory price control mechanism but the basic form of the price control has remained the same. A fair and transparent regulatory regime has helped to encourage greater private sector participation and build a competitive electricity market in Oman.

4 ???· TotalEnergies has been present in Oman since 1937. The Company launched in 2024 the integrated Marsa LNG project (80%), which combines natural gas production from Block ...

Market Overview. The electricity and related water sector in the Sultanate of Oman comprises three separate and distinct market segments : the Main Interconnected System ("MIS") in the north of Oman; the Rural System of the Rural Areas Electricity Company ("RAEC"); and the Dhofar Power System ("DPS").

Allectrify's FASTPACE program is a game-changer. By making it easier for community lenders to fund C-PACE loans, even for projects as small as \$100K, FASTPACE gives property owners and developers greater access to capital for solar PV and other energy improvements.

GE Renewable Energy's Grid Solutions has partnered with Oman Electricity Transmission Company (OETC) to drive the digitization of Oman's power grid, starting with the implementation of an asset performance ...

The latest work of SolarPower Europe's Global Markets workstream contains the most recent economic and political advancements in the country, including the announcement of Oman's new decarbonisation target for 2050, and the latest legislative amendments of the electricity market, including the creation of a new spot market for electricity, following the most recent auction ...
