

Does Palau have a good power system?

The calibration model representing Palau's current power system also confirms this dominance of fossil fuels and the low share taken by renewable energy.

How does Palau manage energy efficiency?

Palau initiated energy efficiency efforts to reduce government energy use through its Energy Conservation Strategy in 2007.

How many diesel generators are there in Palau?

For this study, it was assumed that the total diesel generation capacity of Palau's current power system is 20 MW (the four largest generators present in Palau). Table 2 shows in more detail the generation capacity for each power plant currently present in the country. Source: PPUC and PEA data (n.d.).

Will Palau achieve a fully decarbonised power system?

In conclusion, by following the recommendations outlined in this roadmap, the Republic of Palau will be on the road to achieving a fully decarbonised power system, based on solar and wind power for electricity and transport and supported by battery storage and green hydrogen.
