

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What is a Modula automatic vertical tray warehouse?

Modula automatic vertical tray warehouses allow you to store goods in an clean,tidy,safe and fast-moving system,reducing the number of movements operators need to make and avoiding damage to your goods. Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time,Modula automated vertical storage solutionsare suited to any type of product,in any industry sector or environment,and can be customised to various payloads,heights,sizes and options.

Why should you choose a Modula automatic vertical warehouse?

Modula automatic vertical warehouses have the great advantage of optional configurationof the height,size of the tray and bay,load capacity and number of trays and workstations,down to the details of single trays that can be customised with partitions and dividers.

Automated Storage & Retrieval Systems At Randex we recognize that one size does not fit all and that you need a system to meet your exact needs. Whatever your storage application requires Randex is able to provide the solution for ...

Vertical Lift Modules (VLMs): VLMs are ideal for vertical storage. They use an elevator system to bring trays with stored items to an access point, optimizing vertical space usage. Vertical and Horizontal Carousels: These rotating storage systems bring items to the operator, minimizing walk time and improving picking speeds.

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

Vertical automated storage and retrieval systems (ASRS) are advanced warehouse solutions that efficiently utilise vertical space. These systems employ robotic cranes to transport and retrieve goods from high-rise racking ...

Panama vertical automated storage system

Vertical storage is a type of storage system that utilizes the vertical space of a facility, maximizing storage capacity while minimizing the floor space required. This is achieved through the use of ...

Vertical automated storage and retrieval systems (ASRS) are advanced warehouse solutions that efficiently utilise vertical space. These systems employ robotic cranes to transport and retrieve goods from high-rise racking structures. They are adaptable to different industries and can handle diverse product sizes and weights.

Automatic vertical storage systems enable orderly, clean, safe, and fast storage of goods, reducing transport work by operators and avoiding damage to goods. The "goods to person" principle allows operators to bring products directly to the service opening, instead of having to navigate through the warehouse.

Modula's American-made automated storage and retrieval systems transform your material handling - dramatically boosting productivity and accuracy, reducing storage space requirements, and enhancing worker safety and job ...

Vertical Lift Modules (VLMs) are automated storage and retrieval systems commonly used in warehouses and distribution centers to store and retrieve small-to-medium-sized items in a ...

This solution combines a Modula automatic vertical storage system with a special bay including a comb tray and an autonomous mobile robot (AMR) which in turn is equipped with a special ROEQ module. The Modula comb tray is designed to hold up to 9 boxes, which are automatically picked by the AMR robot - with no need for human intervention ...

Modula's American-made automated storage and retrieval systems transform your material handling - dramatically boosting productivity and accuracy, reducing storage space requirements, and enhancing worker safety and job satisfaction.

At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for picking, packing, and shipping. Solutions can range from miniload or shuttle systems to pallet shuttle to vertical lift modules.

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to ...

This solution combines a Modula automatic vertical storage system with a special bay including a comb tray and an autonomous mobile robot (AMR) which in turn is equipped with a special ROEQ module. The Modula comb tray is designed ...

Modula Vertical Lift Modules (VLMs) are fully automated vertical storage systems that take up a minimum

Panama vertical automated storage system

footprint by utilizing the ceiling height available. These systems allow for large inventory of goods to be quickly accessible while being stored in a safe and secure environment and automatically delivered to the operators, with a simple ...

At their core, automated storage and retrieval systems, or ASRS for short, are computer-controlled inventory management systems that automate the storage and retrieval of unit loads for picking, packing, and shipping. Solutions can ...
