

# Photovoltaic panels can directly replace roofs

Are in-roof solar panels a complete roofing solution?

Although sometimes mistakenly referred to as solar roof tiles, integrated solar panels are not designed to look like tiles or slates, so they aren't generally a complete roofing solution. So, when installing in-roof solar panels, you'll still need to account for other materials in your planning and calculations of in-roof solar panels costs.

Are in-roof solar panels a good idea?

While to some people regular solar panels can be unappealing, an in-roof solar system is a great solution if you want to prioritise your home's design. Lightweight: Unlike a traditional solar panel, which weighs around 18 - 24kg, putting some strain on your roof, integrated solar panels weigh about 10 - 20kg per panel.

Can solar panels be installed on a roof?

This is done by replacing a section of your roof's materials with solar panels. As a result, installing in-roof solar panels is a great option if you're adding them to a building under construction or if you're replacing an old roof.

Are integrated solar panels better than on-roof solar panels?

Whereas on-roof solar panels are known to be an eye sore, integrated solar panels are the modern-day solution. As the solar panels sit in-roof, they appear more streamlined and blend in more seamlessly, making integrated solar panels the more attractive option. Furthermore, In-roof Solar Panels can even be retrofitted to modernise your home.

Can in-roof solar panels be retrofitted?

Furthermore, In-roof Solar Panels can even be retrofitted to modernise your home. As in-roof solar panels replace your roof tiles and don't require a mounting frame, they are a lighter option than traditional Solar Panels. As integrated solar panels are flush with the tile, they are also more wind resistant.

How do in-roof solar panels work on a slate roof?

An in-roof installation on a slate roof using GSE Intergration mounting system. In-Roof Solar Panels Overview: Integrated in-roof solar panels are designed to be part of your roof. They replace traditional roofing materials, effectively becoming a seamless part of the roof structure.
