

How to understand solar mounting system's datasheet?

When aiming to understand solar mounting system's datasheet, professionals must be wary of common pitfalls: **Overlooking Environmental Factors:** Ensure that the mounting system is suitable for the local climate and geography. **Ignoring Compatibility:** Check that the mounting system is compatible with the solar panels and the installation site.

Does IBC Solar offer on-roof mounting?

IBC SOLAR offers on-roof mounting for uncomplicated photovoltaic installation. It is not only cost-effective, but is also equally suitable for new roofs as well as for existing and renovated roofs. IBC SOLAR photovoltaic mounting systems are suitable for pitched roof and flat roof installation.

How to choose a solar mount system?

For instance, roof mounts are suitable for residential buildings, while ground mounts may be ideal for large-scale solar farms. **Compatibility with Solar Panels:** The mounting system must be compatible with the dimensions, weight, and design of the solar panels to ensure a secure and stable installation.

What types of roof mounting systems are suitable for IBC Solar?

IBC SOLAR photovoltaic mounting systems are suitable for pitched roof and flat roof installation. For the respective roof covering such as tile, trapezoidal sheet metal, corrugated eternite, bitumen, foils, green roof or gravel, we offer perfectly matched fixings that guarantee extreme stability.

What is PV-configurator 3?

Our PV-Configurator 3.0 is a unique online design tool that lets solar professionals create a full mounting system with their chosen solar modules, setting parameters and providing structural calculations to ensure the mounting system purchased is perfect for the site down to the millimetre.

What types of PV mounting solutions do you offer?

We offer a selection of PV mounting solutions for various roofs. The MetaSole+(MS+) system has been designed for pitched corrugated or trapezoidal metal roofs. To make the system even more versatile, we have developed a handful of variants of the MS+ system to suit alternative roofs and environments.
