

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

How many islands are in the Pitcairn Islands?

The Pitcairn Islands form the southeasternmost extension of the geological archipelago of the Tuamotus of French Polynesia, and consist of four islands: Pitcairn Island, Oeno Island (atoll with five islets, one of which is Sandy Island), Henderson Island and Ducie Island (atoll with four islets).

How did the Pitcairn Islands make money?

The Pitcairn Islands issued their first stamp in 1940. These became very popular with stamp collectors, and their sale became the dominant source of revenue for the community. Profits went into a general fund which enabled the island to be mostly self-sufficient.

How big is Pitcairn Island?

The four islands-- Pitcairn, Henderson, Ducie and Oeno --are scattered across several hundred kilometres of ocean and have a combined land area of about 47 square kilometres (18 square miles). Henderson Island accounts for 86% of the land area, but only Pitcairn Island is inhabited.

Did Pitcairn Islands get a huge marine reserve?

“Budget 2015: Pitcairn Islands get huge marine reserve”, BBC News. Archived from the original on 18 March 2015. Retrieved 18 March 2015. ^“Pew, National Geographic Applaud Creation of Pitcairn Islands Marine Reserve” (Press release).

Pitcairn Islands Study Center contains the world's largest collection of materials relating to the Mutiny on the Bounty, Captain William Bligh, H.M.S. Bounty, Pitcairn and Norfolk Islands. ... A total of 16 of the mutineers decide to take their chances at safety at Tahiti. Nine others, along with six Polynesian men, 12 women, and a baby girl ...

The economy of the Pitcairn Island is best described as a nano-economy. This is not difficult to understand,

given the tiny size of the population and the even smaller working population, the limited areas for economic exploitation, and the difficulties presented by infrequent access to this tiny island in the middle of the South Pacific.

Renewable Power for Remote Communities. The preceding maps of Solar radiation (Solargis) and Wind energy (Global Wind Atlas) show that Oceania is able to be roughly split into regions close to the Equator and those farther away with different amounts of Solar radiation and ranges of Mean Wind Speeds. Solar Power appears to be the most significant source of Renewable ...

In 2012 we conducted an integrated ecological assessment of the marine environment of the Pitcairn Islands, which are four of the most remote islands in the world. The islands and atolls (Ducie, Henderson, Oeno, and Pitcairn) are situated in the central South Pacific, halfway between New Zealand and South America. We surveyed algae, corals, mobile ...
