

Poland inverter for home price

What is a photovoltaic inverter?

An inverter is a key component of a PV system. It converts direct current (generated by photovoltaic panels) into alternating current of 230 V and 50 Hz frequency, which can be used for current needs. The photovoltaic inverter also monitors the operation of the entire photovoltaic system and synchronizes it with the power grid.

Which solar inverters do you offer?

Our carefully selected inverters convert the direct current produced by the solar modules into alternating current. We offer grid inverters from proven manufacturers such as Delta, Fronius, Huawei, Kostal, LG ESS, SMA and Solar Edge.

How does a photovoltaic inverter work?

The photovoltaic inverter also monitors the operation of the entire photovoltaic system and synchronizes it with the power grid. It keeps track of the maximum power point (MPPT), and acts as an automatic disconnection in case of failure.

How many kW does a Deye hybrid inverter have?

Diversity and Power at Your Fingertips We offer a wide range of inverters, tailored to the various needs of our customers. Our Deye hybrid inverters are available in single-phase versions with power from 3,6 kW to 8 kW and in three-phase versions with power from 6 kW to 12 kW.

What types of photovoltaic inverters are available?

We offer a wide range of inverters with high efficiency and lightweight design. Our offer includes 3-phase inverters, as well as 3-phase 5G inverters. How to choose a photovoltaic inverter?

Who makes currentlu solar inverters?

Ginlong Technologies was established in 2005, and currentlu is one of the oldest and largest manufacturers of solar inverters. Presented under the Solis brand, the company's product line uses innovative string inverter technology to deliver first-class reliability, validated under the most stringent international certifications.
