

Power Grid is the updated release of the Friedemann Friese crayon game Funkenschlag. It removes the crayon aspect from network building in the original edition, while retaining the fluctuating commodities market like Crude: The Oil Game and an auction round intensity reminiscent of The Princes of Florence.

These holistic control rooms--set up and operated properly with the right risk mitigation--help utilities and independent power producers (IPPs) provide reliable, clean, and affordable power to millions of people and businesses. The grid is evolving. The introduction of renewable sources to energy production has radically changed power grids.
