

Power solution international Somalia

Who is Power Solutions International?

For more than 40 years, Power Solutions International has provided OEMs with powertrain products and solutions tailored for diverse needs. PSI has expertise developing, testing, integrating and manufacturing engines for a wide range of applications.

Which companies provide off-grid solar energy solutions in Somalia?

In addition, several other companies exist that provide off-grid solar energy solutions, including Blue Sky, Solargen, Delta, and others. Financing represents the biggest obstacle to Somalia realizing its potential as a hub for renewable energy. International development partners are providing support in the solar energy sector.

Does Somalia have wind power?

Wind Energy: Studies suggest Somalia has high potential for onshore wind power and could generate between 30,000 to 45,000 MW. A pre-conflict 1991 article in the scientific journal Solar Energy assessed that "the wind resource appears suitable for power production in 85 percent of the country."

Does Somalia have access to electricity?

"Access to energy is a precondition to development, supporting livelihoods and powering essential services such as education and healthcare," said UNDP Resident Representative in Somalia Jocelyn Mason. "However, 65% of people don't have access to electricity in Somalia."

What kind of energy is used in Somalia?

Domestic use of energy: Most Somali households use fossil fuels such as charcoal and firewood for household cooking. Charcoal (47.9 percent) and firewood (41.3 percent) are the two energy sources most used for cooking, while gas or electricity are only minimally used.

Who generates electricity in Somalia?

Small and medium-sized private sector companies are the main providers of electricity generation and distribution, primarily running diesel powered systems through off-grid networks. Private Somali companies generate approximately 128 MW; most companies generate and distribute electricity independently.
