What is Puerto Rico energy resilience fund (PR-ERF)?

Puerto Rico Energy Resilience Fund (PR-ERF): In December 2022, Congress approved \$1 billion to improve the resilience of Puerto Rico's electric grid, with a focus on the region's most vulnerable and disadvantaged households and communities.

Does Puerto Rico have a solar program?

To further assist Puerto Rico's energy resilience and clean energy goals, DOE today announced that on February 22, 2024, residents can apply for DOE's Programa Acceso Solar (Solar Access Program) -- a program designed to connect up to 30,000 low-income households with residential rooftop solar and battery storage systems with zero upfront costs.

How much money does Puerto Rico have to pay for solar?

Up to \$190 million is available to Puerto Rico's Housing Administration and a private company to pay for solar and battery installations in public housing common areas and subsidized, multifamily housing properties. Another \$175 million is available for certain healthcare and dialysis centers.

How can Puerto Rico meet its energy goals?

The federal study is expected to be completed by the end of this year. Four different scenarios have been modeled to meet Puerto Rico's targets -- all include more rooftop solar combined with battery storage. First is a focus on installing distributed energy on buildings where owners could then get the financial benefits of generating electricity.

Will Puerto Rico meet its energy needs by 2050?

In 2019, the Puerto Rico legislature passed the Puerto Rico Energy Public Policy Act (Act 17), setting a goal for the commonwealth to meet 100% of its electricity needs with renewable energy by 2050, with interim targets of 40% by 2025, 60% by 2040, the phaseout of coal-fired generation by 2028, and a 30% improvement in energy efficiency by 2040.

What's going on with Puerto Rico's energy plan?

The plan is to transition away from imported fossil fuels -- petroleum, natural gas and coal -- to cleaner sources such as solar and wind. Another goal is to make electricity more affordable. The island's power rates are about twice as high as average rates across the U.S. The federal study is expected to be completed by the end of this year.
