

Nigeria's regulatory authorities have approved the sale of ExxonMobil's assets to Seplat Energy while halting Shell's planned divestment of its onshore and shallow-water operations, reported Reuters.

Nigeria has approved the sale of Exxon Mobil Corp's onshore assets to Seplat Energy, the chief executive officer of the country's upstream regulator said on Monday, more than two years after...

Our change of name to Seplat Energy reflects our belief that the greatest opportunity ahead of us is to supply the right mix of energy for Nigeria's young and rapidly growing population and drive Nigeria's transition to cleaner, more affordable energy that is accessible to all.

Seplat Energy Plc, foremost indigenous energy company, says it is actively pursuing a range of initiatives to decarbonise its operations and support a sustainable energy transition as part of its climate commitments and operational excellence strides
