The exact cost will vary,depending on the size of your home and how much electricity you want to produce. See how much you can expect to pay. Find out: are solar panels worth it?

How much does a solar & battery system cost?

The average cost of a 3kWp solar panel system for a typical property with two or three bedrooms is about £9,000,including installation. This jumps up to around £11,000 if you're adding a 5kWh battery. This is a great time to get a solar &battery system,as there's currently 0% VAT on both panels and batteries.

How much does a solar system cost in the UK?

In the UK, the typical solar panel system sees a labour cost between £300 and £500 per person per day for a skilled two-person crew. While labour may account for 10-30% of your total solar system cost, these figures are not set in stone--alternative pricing options like 20 pence per watt provide flexibility.

How much does a 3.5 kWp solar panel system cost?

A 3.5 kWp solar panel system would typically require around 10 solar panels (at 350 W each) and cost between £5,000 and £10,000. *kWp stands for 'kilowatt peak'. This is the amount of power that a solar panel or array will produce per hour in prime conditions.

How much does a solar system cost?

When you receive a quote for a solar system,it generally includes labour costs,but as a rough guide,the prices can range from £300-£500 per day per installer. The time taken to install a system typically depends on its size and the accessibility of the roof.

How much do solar panels cost in 2023?

This shows that,so far in 2023 (up to the end of September),the typical price per kW of installed solar PV in domestic properties was £2,193. Back in 2021,the average cost was just £1,661 per kW. So,solar panel costs have risen significantly,reflecting general construction sector inflation.
