"The solar farm would generate enough power to meet more than 7% of the Isle of Man's current electricity demand and support the Government's aim for electricity on the Island to be 100% green by 2030." The project represents an investment of around £30m across the 40-year anticipated life of the project, with no public investment.

A 10kW solar system is the best fit to meet your average daily consumption of 40 kWh and offset your heavy electricity bills. With higher efficiency and power potential, this system's capacity is the largest residential solar energy system you can go for. Small businesses and commercial properties can also benefit from a 10kW solar panel system. Its significant ...

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.
