

Ecosun Aruba works with the very highest quality materials. We only use well known and reputable brands for our panels and inverters. Furthermore, all our solar panels are certified for usage in salty and windy environments like we have on Aruba. But even our cables and connectors are carefully chosen for their quality. We want our systems to last.

Ideally tilt fixed solar panels 11°; South in San Nicolas, Aruba. To maximize your solar PV system's energy output in San Nicolas, Aruba (Lat/Long 12.4304, -69.9099) throughout the year, you should tilt your panels at an angle of 11°; South for fixed panel installations.

Save money and energy, invest in Solar Panels. Aruba Bank is a socially and environmentally conscious business. As such we have developed green products and initiatives that allow us and our customers to become more energy efficient and sustainable. Apply online for a Solar Panel Loan or visit one of our branches.

Savaneta, Aruba, located at 12.4505°; N, -69.9307°; W, offers an excellent year-round location for generating energy via solar photovoltaic (PV) systems. Situated in the tropics, this Caribbean destination benefits from consistent sunlight throughout most of the year, with seasons characterized more by wet and dry periods rather than traditional temperature-based seasons.

The solar panels produce 3, 5 megawatt, enough to provide 500 households with green energy. In the upcoming months solar panels will be installed on roofs of different schools and government buildings. The solar park is part of Aruba's 2020 vision to become 100% independent from fossil fuels and makes Aruba a leading example for the region.
