Where can solar power be installed in Turks & Caicos?

Solar-derived power is increasing in popularity, with many private installations visible throughout the country, especially on new Turks and Caicos villa projects. Several local companies specialize in both supply and installation of alternative energy systems. The Fortis TCI electricity plant on Providenciales.

Who produces electricity in Turks & Caicos?

In the Turks and Caicos, all public electricity generation is run by Fortis TCI, a vertically integrated company that provides both power generation and distribution.

How much electricity does Turks & Caicos need?

Current generation capacity is 86 MW across the country, with a peak demand of 46 MW (2022 data). The electricity standard in the Turks and Caicos is 120V, 60Hz and U.S. style power plugs.

Will Fortis TCI install a solar array in North Caicos?

Fortis TCI announced in 2017 that 1 MW of solar capacity is scheduled to be installed in the islands via the utility company, which would include a 700 kW array on North Caicos and 300 kW throughout the other islands. These projects are ongoing. There are two approaches for persons wishing to install a solar array at their residence or business:

Who owns Fortis Turks & Caicos?

Fortis Turks and Caicos (FTCI), a subsidiary of Canadian utility holding company Fortis Inc., acquired P.P.C and AEP in 2006, and concluded an acquisition of TCU in 2012. Electricity is priced via two components: 'Electric' which includes generation and distribution, and 'Fuel Factor' which varies based on global fuel prices.
