

Solar panel set up Jersey

How do solar panels work in New Jersey?

In New Jersey, solar panels are installed on warehouse rooftops and other community projects. The solar power generated is delivered into the local power grid, and you receive dollar credits on your utility bill as if you had generated the electricity yourself. **HOW IT WORKS:** Solar Panels are located at community projects across New Jersey and send electricity into the utility grid.

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

Why should you choose SunWorks Solar?

SunWorks Solar is Jersey's only dedicated PV provider, offering Solar PV to both commercial and residential properties. With more homes in Jersey powered by solar through SunWorks than any other firm, you can trust us for great service and the best suited PV system.

How do I charge my EV with solar power?

To charge your Electric Vehicle (EV) with solar power, you can use a 'smart hot water' controller for managing surplus power into your existing water cylinder and maximize use of generated solar electricity throughout the day. Fast, convenient and safe charging is a must for all electric vehicles. Sun Works also specializes in EV chargers that are compatible with solar, allowing you to charge and drive from solar power.

Produce your own energy, save money & reduce your carbon footprint with Sunworks - Jersey's first dedicated energy optimisation provider. With over 550 local solar installations we are the trusted choice for homeowners and businesses wanting to invest in the future.

Solar photovoltaic (PV) systems are made up of panels that fit on top of your roof, but you can also install them on the ground or fit solar tiles. Solar PV cells are made from layers of semi-conducting material, usually silicon. When sunlight ...

Solar photovoltaic (PV) systems are made up of panels that fit on top of your roof, but you can also install them on the ground or fit solar tiles. Solar PV cells are made from layers of semi-conducting material, usually silicon. When sunlight shines on the panels or tiles, electrons create a flow of electricity.

Why don't the Jersey government encourage more installation of solar panels? The main reason is that it is not required of Jersey to generate any renewable power. Jersey has signed up to the Kyoto Protocol which is focused on cutting carbon emissions between 1990 to 2050 by 80%.
