

Solar panels and battery package Luxembourg

Where to install solar panels in Luxembourg?

Ideally, choose a company "Made in Luxembourg" and approved by the Klima agency to install your solar panels. We work with the most serious and reputable companies in Luxembourg for the installation of solar panels. If you would like a quote for your project, request a free quote.

How do solar panels work in Luxembourg?

In Luxembourg, the main model is that of self-consumption with sale of surplus. To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This system has a number of advantages:

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

At e-Solar, a solar panel and battery package includes solar panels, a solar inverter, and a solar battery. The number of panels and inverter size required will depend on how much energy your household needs. A solar battery allows you to store excess solar power generated during the day for use at night or during power outages.

In conjunction with a power storage system, your solar system can achieve a significantly higher degree of self-sufficiency. Store the PV electricity generated during the day in a battery and then use it when the sun no longer shines, e.g. for charging your ...

Batteries capture and store unused energy generated by your solar panels for you to use when the sun isn't shining. By harnessing natural energy from the sun, it's a cleaner way to power your home and achieve energy independence. B ...
