How many solar power plants are there in Cambodia?

Just two solar power plants are up and running in Cambodia at present, one a 10-MW plant developed by Singapore's Sunseap and another, 60-MW facility in Kampong Speu. Cambodia consumed a total of 2,650 megawatts of electricity in 2018, an increase of about 15% compared to 2017, according to the Ministry of Mines and Energy.

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Why is solar development important in Cambodia?

Solar development will increase investment in modernising the existing energy infrastructure. Plus, off-grid solar and micro-grids will help electrify rural regions that often face the largest energy access issues. Finally, Cambodia's energy prices are some of the highest in the ASEAN.

Will Cambodia increase its solar energy investment in 2020?

The Cambodian government has said it will increase its investments in solar energy by 12% by year-end 2020 and by 20% over the next three years, up from less than 1% at present. "So, in 2020, we will have about 15 percent from solar energy, and we will continue to further increase that number," energy ministry director-general Vitor Jona said.

Bradley now works with Kamworks, a pioneering company in Cambodia's nascent solar energy sector. As the director of business development, he hopes to change the way everyday Cambodians and the government are looking at energy.

Solar energy in Cambodia is becoming an increasingly important part of the country's long-term energy and climate change mitigation strategy. Solar power in Cambodia currently only makes up around 7% of the ...

Solar plant companies Cambodia

Cambodia relies on three main sources for electricity: hydroelectric power plants for more than half, a total maximum capacity of 1,329 MW as of last year, coal power stations of 538 MW, and solar energy of 64.77 MW, according to the ministry.

We can help realise the goal of affordable and reliable power provision for all of Cambodia's energy users, ranging from industrial scale business developments to residential home users. For more information on our products and services, please email info@solarpartners or phone +855 23 990 300

Solar energy in Cambodia is becoming an increasingly important part of the country's long-term energy and climate change mitigation strategy. Solar power in Cambodia currently only makes up around 7% of the country's energy mix, significantly lagging behind hydropower and non-renewable sources.

NE Solar, a global leader in solar cell and panel manufacturing with a total production capacity of 9GW. The factory is strategically located in Phnom Penh, Cambodia, where they boast respective cell production capabilities.
