

Where is Eritrea's first solar plant?

The government of Eritrea has received a \$49.92 million grant from the African Development Bank to fund a 30 MW photovoltaic plant in the town of Dekemhare, 40 km southeast of the capital Asmara. It will be the country's first large-scale solar plant.

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Can Eritrea build a 30 MW solar facility in Dekemhare?

Representational image. Credit: Canva The Ministry of Energy and Mines in Eritrea has initiated a bidding process for the establishment of a 30 MW solar facility in the central region of Dekemhare within the African nation.

Why should Eritrea invest in a solar plant?

This initiative aims to address the energy needs of Eritrea while promoting sustainability and reducing carbon emissions. The solar plant is anticipated to contribute to the nation's energy independence and support its commitment to renewable energy development.

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kWh/m² of solar energy.

Will Eritrea become the largest solar zone in the world?

When completed it will become the largest solar zone in the world. Financing Approval date 1 March 2023 Project name: Dekemhare 30-megawatt photovoltaic solar power plant project in Eritrea.

This report covers solar PV system costs and prices in the United States across all market segments. It includes detailed breakdowns for national average system costs with various module, inverter and racking technologies. The report forecasts system costs from 2020 through 2033, diving into the drivers and challenges for cost reduction.
