Solar panels are made of photovoltaic cells that convert the sun's energy into electricity. Photovoltaic cells are sandwiched between layers of semiconducting materials such as silicon. Each layer has different electronic properties that energize when hit by photons from sunlight, creating an electric field.

The Food and Agriculture Organization of the United Nations (FAO) invites you to submit an offer for the Procurement and Installation of Solar Irrigation Pumps to be delivered to FAO Warehouse in Juba South Sudan. If you are interested in submitting an offer, please make sure to have, at least, a UNGM Basic Registration with FAO ().
