

Is solar energy a good choice for Kenyans?

Hezel, like many Kenyans, did not opt for solar energy solely out of a desire to safeguard the environment and combat climate change. She said it is a cost-effective alternative to relying on Kenya's primary energy provider. "It is a lot cheaper than what Kenya Power charges," she said.

Does Kenya have a solar industry?

Yes, Kenya has an active solar industry. Over the years, there has been increased investment in the country's solar industry. The government of Kenya, through the Ministry of Energy (MoE), has initiated programs intended to electrify schools and health facilities in rural areas using solar systems. This includes provision of solar powered laptops to primary schools.

What are the pillars of achieving a solar vision in Kenya?

Achieving a solar vision in Kenya relies on several key elements. One of these is manufacturing, which is enabled by the availability of clean and reliable energy. Kenya's estimated solar potential is almost 15000 MW, with the current installed capacity being more than 100 MW. The largest installation to date is Garissa Solar, with a capacity of 55MW.

Is China dominating Kenya's solar market?

Kenya's market bears witness to China's undeniable dominance, as evidenced by the exclusive reliance of Chloride Exide, on Chinese suppliers for all their large-scale solar panels adorning the roofs of their factory halls.

Another key player in the growth of the solar energy sector in Kenya is the private sector whose activities have seen an estimated 200,000 rural households get connected to the solar home systems. The high level of uptake has been through sale of products that best fit the purchasing power and making products available within mobility range of ...

Solar Energy Initiatives in Kenya. One innovative approach that has made solar energy accessible to low-income households in Kenya is the pay-as-you-go (PAYG) model. This model allows users to pay for solar systems in small, manageable installments using mobile money platforms. The PAYG model reduces the upfront cost barrier, enabling more ...

It is number 9 of the largest solar projects in Kenya. The solar park will be developed and owned by a Chinese firm locally registered as Kenya Solar Energy Ltd. (Kensen). The contractor for the engineering, procurement and construction (EPC) is Wartsila Eastern Africa Ltd., the local subsidiary of Finnish energy firm Wartsila.

Kenya is on an ambitious quest to provide electricity for all its citizens by 2022. This article examines how solar power is helping to achieve this universal access goal. It does so by discussing policies and incentives Kenya is using to both encourage local consumption of solar energy and attract private sector solar investment in Kenya.

These conditions resulted in 58% of solar energy kit sales in 2023 using cash and PayGo systems. The figure below shows the evolution of sales volumes of solar energy kits from 2021 to 2023. Sales Volumes of Solar Energy Kits - Kenya. Figure 2: Semi-annual Evolution of Sales Volumes of Solar Energy Kits -Kenya. Source: GOGLA.

Solarenergy Kenya

We offer solar PV and solar water heating solutions for commercial and industrial, and residential use. Our solutions are available across Kenya, and in major towns and cities: Nairobi, Mombasa, Kisumu, Nakuru and Eldoret.

Sales of off-grid solar energy kits in East Africa in the second half of 2023 surpassed 2.5 million units, and Kenya is the largest off-grid-solar market in the region, representing 74% of total sales. While this is a 14% increase compared to the first half of the year, it represents a 1% decrease compared to the same time in 2022.
