

South Sudan lng storage tanks

Where are Sudan's export pipelines located?

Sudan has two main export pipelines that travel north across the country to the Bashayer Marine Terminal, located about 15 miles south of Port Sudan. Most of Sudan's storage facilities for crude oil and refined products are also located at the Bashayer Marine Terminal.

How does South Sudan export crude oil?

South Sudan exports all of its crude oil via pipeline through Sudan. The Petrodar (PDO) pipeline transports crude oil from Palogue and Adar Yale oil fields (Blocks 3E and 7E) in the Melut Basin to the Bashayer Marine Terminal in Port Sudan.

What type of crude oil is produced in Sudan?

Sudan and South Sudan produce three crude oil blends: Dar, Nile, and Fula. The Dar blend (25.0° API gravity, 0.11% sulfur) is a heavy paraffinic type of crude oil that has a high acid content and must be heated during transport to avoid congealing in ship tanks.

Where is the largest oil refinery in Sudan?

The al-Jaili refinery, located approximately 45 miles north of Khartoum, is the country's largest, with a capacity of 100,000 b/d. The other full-conversion refinery is the Port Sudan refinery (21,700 b/d), and the three topping plants are El-Obeid (10,000 b/d), Shajirah (10,000 b/d), and Abu Gabra (2,000 b/d).

How many oil refineries are in Sudan?

Sudan has two oil refineries and three topping plants (smaller, less complex refineries). However, the only active refineries are the Khartoum (al-Jaili) refinery and the El-Obeid topping plant. The al-Jaili refinery, located approximately 45 miles north of Khartoum, is the country's largest, with a capacity of 100,000 b/d.

Are Sudan's oil fields depleting?

Sudan brought two small oil fields in Blocks 6 and 17 online at the end of 2012, and the country is exploring offshore production in the Red Sea Basin. However, progress in developing the Red Sea Basin area has been slow. In addition, Sudan's oil fields are reaching maturity and so nearing depletion.

How to ensure the LNG send-out from a Floating Storage Unit with minimum infrastructure? Trelleborg recommends the use of a Floating Storage Unit (FSU), which it says are increasingly considered "a great alternative" to the ...
