

State Power Investment Corporation photovoltaic panels

What is SPIC solar?

Holds over 238GW power plants, including solar, wind, hydropower, nuclear and thermal power. Annually reduce over 200Billion tons CO₂ emission by clean energy. SPIC Solar's main products are BC solar cells and modules, including monofacial modules, bifacial modules, BIPV series, and flexible modules, which can fully meet various scenarios.

How much solar power does SPIC have?

Of this installed power, around 10.28 GW was for solar installations and approximately 11.58 GW for wind farms. At the end of last year, SPIC reached a cumulative clean energy capacity of 98.88 GW, of which 60.49 GW is solar, which makes the company the largest PV asset owner in the world.

When will Xingchuan demonstration photovoltaic power station be completed?

It plans to complete the solar park by September 2023. SPIC said it completed the pilot solar power plant near the town of Zhengdou, in China's Sichuan province. The Xingchuan Demonstration Photovoltaic Power Station is the first unit of a 600 MW project that SPIC is building in the area at a planned cost of CNY 3.2 billion (\$444.2 million).

Where is SPIC solar made?

SPIC Solar currently produces IBC panels and the new TBC product at its two manufacturing facilities, which are located in Xining, Qinghai province, and Xi'an, Shaanxi province. This content is protected by copyright and may not be reused.

How many solar plants does SPIC have in 2023?

As of 2023, SPIC holds over 69.19GW solar plants, ranking 1st in the world for 8 successive years, also the biggest clean energy supplier in the world.

When will SPIC complete a solar park?

SPIC plans to complete the solar park by September and said that it will become a technological benchmark for all future solar parks built at high altitudes. China Daily has reported that the plant was originally designed to have a capacity of 400 MW. This content is protected by copyright and may not be reused.

PVTIME - On December 9, the Putian Municipal Government and the State Power Investment Corporation Fujian Electric Power Co., Ltd. (hereafter referred to as "SPIC") signed a cooperation framework agreement ...

Chinese energy giant State Power Investment Corp. (SPIC) has switched on a pilot facility at 4,000 meters above sea level. It plans to complete the solar park by September ...

State Power Investment Corporation photovoltaic panels

We are part of State Power Investment Corporation (SPIC), a global power generation and related projects company - one of the top five in the world in this segment. Our focus is on generating ...

State Power Investment Corp. (SPIC) built the huge facilities in five phases with the support of PowerChina, an engineering, procurement and construction (EPC) contractor. The project will stretch ...

The Saudi Power Procurement Company signed for 700MW solar plant in Qassim region in the Kingdom of Saudi Arabia with Ar Rass Solar Energy Co., which owned by a consortium led by Water and Energy Works ...

SPIC Solar, a unit of State Power Investment Corp. (SPIC), unveiled a photovoltaic module at the Shanghai SNEC event last week that combines TOPCon and back contact (BC) solar cell technologies ...

China State Power Investment Corporation acquires Mexico renewable energy company Zuma Energia. Zuma Energia is Mexico's largest independent renewable generator, with 818MW of installed wind and solar ...

SPIC Brasil, a subsidiary of State Power Investment Corporation of China, is acquiring two solar power generation projects in Brazil's Northeast region, from Canadian Solar. SPIC now holds a 70 per cent majority stake in the projects ...

According to the Declaration on Building a World-Class Photovoltaic Industry recently released by the State Power Investment Corporation, it is estimated that by 2025, the ...
