

What is greenonetec Sunpad?

Sunpad is Greenonetec's response to demand for thermosiphon systems, a huge market around the world, estimated at about 7 million units annually. The notable difference is that the new product has merged the collector and tank into one unit, so that building owners will no longer have to deal with large metal vessels on their roof.

What is Sunpad Solar System?

SUNPAD is a unique and completely new solar system. By integrating the heat carrier tank into the insulation, which includes all supporting components at the same time, we have created the most compact solar system available on the market. Due to the small number of components, the system is virtually maintenance-free.

Is greenonetec's Sunpad the new solcrafte?

And, indeed, the design, setup and price of Sunpad represent a significant departure from Solcrafte, Greenonetec's first integrated storage collector device, on display at the ISH 2013 six years ago. Sunpad is Greenonetec's response to demand for thermosiphon systems, a huge market around the world, estimated at about 7 million units annually.

Where can I find more information about Sunpad?

More information about our revolutionary SUNPAD can be found here and at sunpad.solar. The #1 in the development and production of solar collectors, mountings as well as design of concepts for large-scale systems. made in Austria.

What is a Sunpad & how does it work?

It is a thermosiphon system with the special feature being that the collector and the tank are merged into one unit. Hence building owners no longer have to have large metal vessels on their roofs, as is usual for thermosiphon systems. Greenonetec has developed its Sunpad as a cost-effective solution for sunny regions.

Is Sunpad a good thermosiphon system?

Selim sees one important advantage of Sunpad being that it can be sold to subcontractors, "as it doesn't require high technical skills, providing confidence for self-installation". Another outstanding factor is the slim design of Sunpad, outshining traditional thermosiphon systems, added Selim.

Le chauffe-eau solaire autonome monobloc Sunpad peut produire jusqu'à 300 litres d'eau chaude sanitaire instantanément. Avec sa technologie révolutionnaire et son rapport qualité-prix imbattable, SUNPAD SOLAR se positionne comme une des meilleures alternatives !
