

How much solar energy does Switzerland generate?

In 2022, Switzerland derived 6% of its electricity from solar power. Studies show that installing solar panels on mountaintops in the Swiss Alps could produce at least 16 terawatt-hours (TWh) a year, approaching half of the nation's 2050 solar energy target.

How much solar energy does Switzerland use in 2022?

Solar energy production accounted for 6.76% of Switzerland's electricity consumption in 2022 (4.89% in 2020). This year, solar energy will cover more than 8% of demand. The number of new storage batteries installed more than doubled compared with the previous year. The average storage capacity rose sharply from 12 to almost 15 kWh.

Can solar energy be used in Switzerland?

Although the proportion of solar heat to overall consumption in Switzerland is still relatively low, its potential is considerable. If all existing buildings were to be optimally improved in terms of energy efficiency, it would be possible to meet the heating requirements of all Switzerland's households through the use of solar collectors.

Who surveys the solar market in Switzerland?

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

Is Switzerland a good country to install solar panels in 2022?

Switzerland had its best year in terms of new PV deployment in 2022, with more than 1,000 MW of installed capacity, according to provisional statistics from Swissolar. At the end of December, the nation surpassed 4.6 GW of cumulative installed solar capacity. From pv magazine Germany

Should solar panels be required in new buildings in Switzerland?

Since 2015, the Swiss government has published a recommendation for the energy policies in cantons. These regulations should include a requirement for PV in every new building. In a majority of cantons, a requirement of including about 10 W PV per square meter of heated area for new buildings is already implemented.
