

Gas production held up a bit better. But gas output dropped from a pre-war 8.4 billion cubic metres per year to 3 billion cubic metres in 2023. Syria could also have been an important transit state, with gas flowing from Egypt to Lebanon, but again this was interrupted by the war, worsening Lebanon's energy crisis.

Energy is a central source for human activity and progress. Yet the world's energy industry is in a constant state of development, as the steady transition from traditional sources to clean energy impacts every aspect of life. At ICL, we are committed to developing sustainable solutions for the energy industry.

The conflict in Syria has imposed severe challenges on the country's energy sector, impacting daily life, livelihoods, the economy, and humanitarian aid operations. The scarcity of oil and natural gas has made it harder to meet electricity demand, and while solar panels have emerged as an alternative, their high costs render them inaccessible ...

A new decade means new energy technologies. As we head into the 2020s, it's an exciting time for energy. A deeper level of climate consciousness has led to crucial changes in populations' attitudes and thinking around how we power our lives - adapting to a new set of energy standards has become essential.. It's also driving innovation in energy technology, ...

With these innovative solutions developed for the Syrian market, Karmod aims to meet not only the needs of today but also the needs of the future. The company offers products focused on sustainability and energy efficiency in ...

Community initiatives like Khirais" solar panel tap into Syria's high potential for solar energy, enabling people to shift away from fossil fuels, which will reduce emissions, provide decentralised energy, reduce air pollution ...

Founded in 2002 in Hama, Syria, KFP has evolved from a small operation with limited resources into a major player in the solar systems manufacturing sector. We offer a wide range of products, including solar water heaters and photovoltaic systems for industrial, agricultural, commercial, and residential applications.

Innovative Energy Solutions is a leading solar energy company and engineering consultant in Rawalpindi, Pakistan. We offer customized solar solutions for residential and commercial properties, reducing reliance on traditional energy sources and promoting sustainability. Our services include mechanical, electrical, and plumbing solutions.

This infographic summarizes results from simulations that demonstrate the ability of Syria to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat supply, storage, and demand
