How does TikTok work?

TikTok is a platform designed to spread the word. Twitter and Instagram show users content based on who they are following. But on TikTok, you don't have to painstakingly search for content that fits within your interests. Instead, the app utilizes an algorithm driven by the videos you watch and the comments you leave.

Can TikTok be an activist platform?

Biabani is one of many activists of color in the environmental justice space who believe in TikTok's potential as an activist platform. The beauty of TikTok lies in the fact that each activist in the climate community can spotlight their own expertise, whether it be veganism and soil quality or policy and fast fashion.

Where can you find environmental education on TikTok?

Search for or like enough environmental stories on TikTok and more end up on the "for you page." Lovers of all things environmentalism and climate science will eventually curate an amazing range of environmental education. There's Eco\_Tok, which curates content from a number of environmental activists and educators in one hub.

Why is TikTok so popular?

The beauty of TikTok lies in the fact that each activist in the climate community can spotlight their own expertise, whether it be veganism and soil quality or policy and fast fashion. These young activists see the app as a way to make environmentalism accessible and as a place to create community. TikTok is a platform designed to spread the word.

What is climate TikTok?

Brown has found EcoTok and the larger climate justice community on TikTok a welcoming space for creators of color like herself. Throughout Climate TikTok, creators can find a healthy balance between education, humor, and lifestyle content.

Is TikTok educating people about environmentalism?

TikTok may be best known for its goofy dance challenges and audio-based memes. But Biabani uses the app to educate others about intersectional environmentalism. In one TikTok, Biabani, a former dancer, recaps "good eco news" while dancing to Cardi B's "Up."
