

Tokelau centiel premium tower

What is premium tower?

PremiumTower offers scalability of up to 7.5 MW and delivers unbeatable energy efficiency in a robust and compact design. The flexibility in the number of battery blocks (20 to 50) allows the system designer to optimize costs vs autonomy time.

Why should you choose premium Tower TM?

At the same time, the high efficiency of 96.6% in double conversion (VFI) and 99.4% in Ultra-safe ECO mode guarantees maximum energy savings and Lowest Total Cost of Ownership. PremiumTower™ provides unity power factor which avoids the need for system over size to support today's power factor corrected loads.

What is the short circuit capacity of premium Tower TM?

With a Short Circuit Capability of 3 times nominal current(3 x In),PremiumTower (TM) is able to clear output circuit protection in milliseconds. Internal Isolation Transformer

What are the benefits of a premium tower ups?

High efficiencies in VFI and ECO mode. PremiumTower provides optimized partial and full load efficiencies of up to 96.6% in online double-conversion mode. In Ultra-Safe ECO mode the UPS provides an excellent power quality with 99.4% efficiency. Minimized footprint (save of valuable floor space).

Does premium Tower TM integrate a transformer with an ups?

Internal Isolation Transformer If galvanic isolation, voltage step-up or voltage stepdown is required, PremiumTower (TM) can integrate the transformer within the same UPS increasing the flexibility on system development. Minimized Footprint
