

Tokelau sigora solar

Can a solar array power Tokelau?

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean, reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

What is New Zealand doing with Tokelau solar?

New Zealand company Powersmart is working on the project with IT Power Australia, the Government of Tokelau and the New Zealand Aid programme. "New Zealand is advancing \$7 million to Tokelau to fund installation of the systems. All three solar plants are expected to be operational before the end of the year," Mr McCully says.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location, switching to solar was absolutely crucial for the tiny collection of islands. "Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change," Mayhew stressed.

When will Tokelau's first solar power system be operational?

All three solar plants are expected to be operational before the end of the year," Mr McCully says. Foreign Affairs Minister Murray McCully today welcomed the launch of Tokelau's first solar power system. It is the first of three systems that, when fully operational, will provide almost 100 per cent of Tokelau's power.
