Could distributed energy resources boost the deployment of renewables on islands?

Distributed energy resources - or small-scale energy resources that are usually situated near sites of electricity use, such as rooftop solar - could play an important role in boosting the deployment of renewables on islands, increasing the security, resilience and affordability of power systems while accelerating decarbonisation.

What is Block Island's energy plan?

Block Island, Rhode Island is looking to identify renewable energy sources that can be used to generate electricity on the island and reduce reliance on imported electricity and fuels. The community will engage in energy planning to shore up its resilience, particularly in the face of sea-level rise.

Do IEA islands need resilient power systems?

Islands need resilient power systems more than ever. Clean energy can deliver - Analysis - IEA Islands need resilient power systems more than ever.

Why do small islands need a new energy infrastructure?

Islands - including those that make up the group known as Small Island Developing States (SIDS) - also need to upgrade their energy infrastructure so that it is resilient to higher temperatures, more frequent natural disasters and flooding related to rising sea levels.

Could geothermal power power a small island?

While most small islands will have to rely on intermittent solar or wind power, others are blessed with significant geothermal or hydroelectric potential that could provide a baseload electricity supply, and could conceivably follow the paths of Iceland and New Zealand.

Does Maui have a solar-energy microgrid?

Now, the island runs on a completely renewable microgrid that meets 100% of residents' energy needs through solar power and battery storage. In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped design and implement Ta'u's solar-energy microgrid composed of over 5,300 solar panels.

High-grade solar cables are essential for optimizing performance and cutting costs over the lifetime of your PV system. Not only do they offer superior sunlight resistance for outdoor installations, but they also have flame resistance for added safety. Solar cable is used to attach your solar panels to an inverter and battery.
