

# Un boxes for lithium batteries Gibraltar

What is a UN3481 lithium ion battery?

UN3481: Lithium-ion batteries packed with or contained in equipment. UN3090: Loose lithium metal batteries shipped by themselves (non-rechargeable). UN3091: Lithium metal batteries "packed with" or "contained in" equipment. When it comes to packaging labels, requirements may vary, especially when shipping in small quantities.

What are the legal requirements for packaging lithium ion batteries?

The legal requirements of packaging lithium ion batteries are drawn up by the United Nations and are registered under the code UN3480. These regulations specify which materials you can use, what type of packaging is suitable for lithium ion batteries and what packaging instructions you have to follow.

Can a lithium ion battery be shipped as cargo?

may be shipped as cargo on a passenger aircraft under an approval issued by the authority of the State of Origin, State of Destination and State of the Operator where the lithium ion cells or batteries that meet the quantity limits of Section II of PI 965.

What is a lithium battery packaging?

This packaging is just one of our growing range of lithium battery packagings, tested and approved for shipping lithium ion or metal batteries and suitable for all modes of transport. Packaging is supplied without labels. These can be ordered separately here. This specific packaging enables shippers to transport total packaging weight of up to 13kg.

Does a lithium battery Mark have a UN number?

Yes. The mark may bear all applicable UN numbers, e.g. UN 3091, UN 3481, to identify that the package contains lithium metal batteries packed with or contained in equipment and lithium ion batteries packed with, or contained in equipment. J. What are the requirements for the telephone number on the lithium battery mark?

Are lithium ion batteries safe to ship?

When shipping lithium ion batteries, there are some legal regulations you have to comply with to maintain safety. The United Nations describes all of them extensively in the 'Recommendation on the transport of dangerous goods - Model Regulations', which is updated and revised regularly.

Lithium batteries are classified in Class 9 - Miscellaneous dangerous goods as: o UN 3090, Lithium metal batteries; or o UN 3480, Lithium ion batteries or, if inside a piece of equipment or ...

Lithium batteries are classified in Class 9 - Miscellaneous dangerous goods as: o UN 3090, Lithium metal batteries; or o UN 3480, Lithium ion batteries or, if inside a piece of equipment or packed separately with a
