

The United Arab Emirates (UAE), a major oil and gas producer and exporter, ranks 63 out of 120 countries on the ETI 2023. Over the last 10 years, the UAE's ETI score has fluctuated, mainly due to the transition readiness dimension, but the overall trend suggests a gradual strengthening of the enabling environment for the energy transition.

United Arab Emirates: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The United Arab Emirates has committed to the global carbon agenda and plans to reduce carbon dioxide emissions by 30% by 2030. In 2017, the United Arab Emirates also launched the Energy Strategy 2050, which aims to diversify current energy sources and double the country's use of clean energy sources by 2050.
