

Vatican City stores energy

How can Vatican City achieve climate neutrality?

A. Climate neutrality can be achieved by Vatican City State primarily through the use of natural sinks, such as soil and forests, and by offsetting emissions produced in one area by reducing them in another. Of course, this is done by investing in renewable energy, energy efficiency or other clean technologies such as electric mobility.

Does Vatican City contribute to global emissions?

Although the Vatican City State contributes to global emissions in an insignificant way, it considers it essential to invest in quality emission reduction projects as well as in integral ecology education initiatives, which, in addition to the mitigation of greenhouse gases, also lead to ethical and social benefits.

Is Vatican City the smallest state in the world?

As Vatican City is the smallest state in the world, it does not exactly require a large amount of renewable energy to achieve this title. However, the city's solar installations, which include solar panels installed on the rooftop of Paul VI's conference hall, mean that the city can now generate enough energy to power all of its 40,000 households.

What is the transient population of the Vatican City State?

The transient population of the State is approximately 6,000 people, to which it must be added those (family members, pensioners, beneficiaries of the Health Fund and professional collaborators) who use the goods and services provided by the State. Unlike other States, the Vatican City State does not have its own productive sector.

Why is the Vatican a good place to live?

An important milestone in terms of respect for the environment is that this year the State has achieved its goal of being pesticide-free. A new watering system for the Vatican Gardens has also been installed, saving about 60% of water resources.

Is Vatican City the greenest state in the world?

Now complete and in operation, the installation of this array has not only made Vatican City the first solar powered nation state in the world, but according to the state's official newspaper, it is now the greenest state in the world.
