What temperature should a generator be handled at?

The wind turbine generator should not be handled at a temperature below  $-20^{\circ}\text{C}$ . (Please refer to section 3.1 for lifting the machine.) In case the generators are shipped by sea, a seaworthy packing hermetically sealed (Crate 4C SEI NIMP 15 Standard) will be used. Breaking the hermetic protective film discharges Leroy-Somer of its warranty.

Can a 2 MW wind turbine generator be thermally analyzed?

This paper focuses on the thermal analysis of a 2 MW wind turbine generator. The goal is to estimate the stator winding temperature with a model as straightforward as possible. Boundary conditions are that no additional sensor than the ones already installed in the wind turbine should be used.

Why do wind turbines need temperature and pressure sensors?

The components in wind turbines produce a lot of heat, which needs to be transferred to other media or dissipated into the air. A global specialist in water cooling was looking for a company that could supply both the temperature and pressure sensors for their specialized systems.

How do I know if my generator is working properly?

To check the functioning of a wind turbine generator, determine the wear rate in mm per 1000 hours of operation and compare it with earlier figures. This information can be obtained by checking the slip rings and brushes. Additionally, ensure all connections, including slip ring brushes, rotor and stator terminals, are properly torqued.

Do wind turbines need additional sensors?

Boundary conditions are that no additional sensor than the ones already installed in the wind turbine should be used. In this paper, a thermal model for the temperature analysis is presented as well as a sensitivity analysis of the model parameters.

Why are generators important in wind turbines?

Generators are the backbone of all electricity generation. Since the wind energy represents one of the key energy sources of the future, generators in wind turbines are the focus of research in the last years.
