What is happening in South Georgia & the South Sandwich Islands?

There are also a series of no-take zones around the islands, and the closure of the krill fishery November to March, when krill-eating birds and marine mammals are breeding. In 2018 the Government of South Georgia & the South Sandwich Islands (GSGSSI) announced further protections:

What is the ccTLD for South Georgia and the South Sandwich Islands?

The Internet country code top-level domain (ccTLD) for South Georgia and the South Sandwich Islands is .gs. The parts of the islands that are not permanently covered in snow or ice are part of the Scotia Sea Islands tundra ecoregion.

What is the economy of South Georgia based on?

The economy is based on commercial fishing for which licences are issued, tourism and the sale of stamps. Licensed commercial fishing for toothfish, icefish and krill takes place in the surrounding seas of South Georgia and the South Sandwich Islands (SGSSI).

Are the South Sandwich Islands biodiverse?

The South Sandwich Islands are an isolated, oceanic, volcanically formed archipelago in the Atlantic sector of the Southern Ocean. The complex bathymetry, coupled with the location in the marginal sea-ice zone and the relationship with the ACC makes the region both productive and biodiverse.

Why is South Georgia a marine protected area?

On 23 February 2012, to protect marine biodiversity, the territory's government created the South Georgia and the South Sandwich Islands Marine Protected Area - comprising 1.07 million km² (410,000 sq mi). After the Falklands War in 1982, a full-time British military presence was maintained at King Edward Point on South Georgia.

How does tourism make money in South Georgia?

Tourism has become a larger source of income in recent years, with many cruise ships and sailing yachts visiting the area (the only way to visit South Georgia is by sea; there are no airstrips on the Islands). The territory gains income from landing charges and the sale of souvenirs.
