

Wind

What is a wind equilibrium?

Winds defined by an equilibrium of physical forces are used in the decomposition and analysis of wind profiles. They are useful for simplifying the atmospheric equations of motion and for making qualitative arguments about the horizontal and vertical distribution of horizontal winds.

What is a solar wind?

Rather than air, the solar wind is a stream of charged particles -- a plasma -- ejected from the upper atmosphere of the Sun at a rate of 400 kilometers per second (890,000 mph). It consists mostly of electrons and protons with energies of about 1 keV.

Is wind energy variable?

Wind energy is "variable": how much electricity it produces depends on how much wind is blowing. In any energy system that relies partly on wind, other energy sources have to be ramped up when winds are low.

What happens if a wind reaches 135 mph?

Winds of this strength due to downsloped winds off terrain have been known to shatter windows and sandblast paint from cars. Once winds exceed 135 knots (250 km/h), homes completely collapse, and significant damage is done to larger buildings. Total destruction to artificial structures occurs when winds reach 175 knots (324 km/h).

Which country has the highest wind speed?

Australia's Barrow Island holds the record for the strongest wind gust, reaching 408 km/h (253 mph) during tropical Cyclone Olivia on 10 April 1996, surpassing the previous record of 372 km/h (231 mph) set on Mount Washington (New Hampshire) on the afternoon of 12 April 1934. Wildfire intensity increases during daytime hours.

What is a long-duration wind?

Long-duration winds have various names associated with their average strength, such as breeze, gale, storm, and hurricane. In outer space, solar wind is the movement of gases or charged particles from the Sun through space, while planetary wind is the outgassing of light chemical elements from a planet's atmosphere into space.

Hi there. @Brink Tried clean installing again . Thanks for the instructions --but : Whatever I did it wanted to charge a Credit card 121 EUR -- however when I entered product key of BOLL----- and hit enter it then went to the upgrade screen and nothing taken off Credit card(s).

D) On occasion you will encounter an archive that contains no dump files. This usually means that the user's Windows configuration is not set to create dump files on BSOD, refer the user to Dump Files - Configure Windows 10 to Create on BSOD to ensure the machine creates dump files on subsequent BSODs.

Weather Forecasts Where You Sail. Multiple Forecasts for all spots worldwide! And- Since 1987, our staff meteorologist-written PRO Forecast discussions are the gold standard: simply the finest in-depth Wind Forecasts available ANYWHERE.

OverviewCausesMeasurementModelsWind force scaleGlobal climatologyLocal considerationsShearWind is the natural movement of air or other gases relative to a planet's surface. Winds occur on a range of scales, from thunderstorm flows lasting tens of minutes, to local breezes generated by heating of land surfaces and lasting a few hours, to global winds resulting from the difference in absorption of solar energy between the climate zones on Earth. The two main causes of large-scale atmospheric circulation are the differential heating
