Dominican Minister of Energy and Mines Antonio Almonte told his colleagues that the Dominican nation has taken large steps forward in the area of renewable energy, especially in the use of solar panels. Almonte went so far as to say that the DR is the country with the largest increase in the use of solar energy.

Un sistema fotovoltaico doméstico es un conjunto de paneles solares que convierten la radiación solar en electricidad. Puedes elegir un sistema aislado, que no está conectado a la red eléctrica, sino a baterías que almacenan el excedente de energía. Así podrás tener electricidad incluso cuando no haya sol o cuando haya un fallo de la red.
